Continuation of 3. NOTE: The proposed amendments raise new issues that would require further consideration and/or search. For instance, claim 26 and its dependents now recite the limitation that the dose contains at least a certain number of cfu of an isolated bacterium. This limitation was not included in the previously examined claims and would require further search and/or consideration.

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments have been considered, but they have not been found to be persuasive. Applicant's arguments are directed to new claim limitations that have not been entered because they wourd require further search and/or consideration (see above). Further, althought applicant argues that the finality of the previous action should be withdrawn, it is noted that all claims for which a rejection/objection was applicable were addressed. Therefore, applicant's arguments have been considered, but they have not been found to be persuasive.
